SUMMARY OF QUALIFICATION

- **Technical Skills:** Highly experienced with front-end technology such as JavaScript/TypeScript, React or Next.js. Provided many high-quality mock-ups for approval by clients.

- **Client Support**: Consulted and supported clients by fulfilling all their requests, such as adding new pages/subpages, stylistic changes to their website using CSS or SASS/SCSS and content changes using WordPress and CMS.

- **Creative Skills:** Excellent at sourcing and selecting ideal information that fit the website's design, layout and flow while meeting the client's vision. Outstanding organisational, time-management skills and exceptionally detail-oriented.

- **Communication**: Excellent communication skills in Russian, Polish and Ukrainian. Intermediate English level. Experienced in professional, detailed communication & problem-solving. Successful at working both independently and in collaborative environments.

PROFESSIONAL EXPERIENCE

Front End Developer | NO INPUT SIGNAL | Warszaw, Poland
August 2021 - Present

- Regularly attended technical team meetings and collaborated with **Senior Developers** on client projects.

- Created and modified **20+ web projects** by utilising and incorporating a variety of **graphics, database, animation and software,** which **exceeded** clients' expectations

- Created **reusable functional components** and styled them for appropriate use on the website.

- Received and displayed different sets of **data from API**, reviewed the **accuracy of the output** to make sure it is correct and smoothly **interacted with by users**.

- **Created and filled new and existing fields** with any content and material provided by the client through CMS while also matching the design and layout of the project.

- Assisted clients by providing instructions to easily make any necessary future changes to their project after it is completed and approved by them.

Front End Developer | FLAVE | Own StartUp
June 2022 - Present

- Developing a web application and, in the future, a mobile application for the restaurant business, which will improve **communication between the restaurant and the clien**t, speed up the time to complete and receive the order.

- Close cooperation with the back-end developer for **greater optimization and improvement of the application functionality**.

Front End Developer | NOIR beauty, ICON beauty | Freelance
March 2022 - May 2022

- Created one-page website with all relevant links to social networks which **helps to promote business** on the Internet.

- **Generated a QR code** that allowed to increase the rate of potential customers.
